

Instructions for Authors

General information

- Deadline for paper submission is ~~March 18, 2012~~ April 3, 2012.
- Papers must not exceed 8 pages.
- Since the proceedings of the SMPS 2012 will be published by Springer submissions have to be written in L^AT_EX using the style contained in the zip-folder

contributions_SMPS2012.zip

Preparation of manuscripts

- Copy the files contained in the zip file to your working directory
- Use the template `author_SMPS2012.tex` (which includes the Springer document class `svmult.cls`) to write your article, run L^AT_EX and produce your own example *.dvi or *.pdf file
- The **first manuscript page** should contain the *title* of the paper, *author(s) names* (including affiliations), a short *running title* and *full addresses* of the corresponding author (including *e-mail*, *postal address*, *fax* and *phone*).
- Each paper has to be preceded by a short **abstract** (5 lines long) that summarizes the content plus a list of (up to five) Keywords.
- In general, text, formulae, figures and tables should be typed using the standard L^AT_EX commands. The standard sectioning commands may be used.
- For individual text structures such as theorems, definitions, examples, etc., the SVMULT document class provides numerous predefined environments (numbered as well as unnumbered) which conform with the specific Springer layout requirements. Do not include any new definition (e.g. `\newenvironment`, `\newcommand`, or `\def`).
- Please always give a `\label` where possible and use `\ref` for cross-referencing.
- **Figures** should be numbered consecutively and their captions by default are set flushleft with the caption placed beneath the figure. Figures should be in .eps format with fonts embedded, without preview and with the so-called bounding box adjusted to the actual content of the figure. Use the standard L^AT_EX `graphicx` package to include your graphics files. In general any colour figures will be converted into b/w figures or graytones for the printed version of the book.
- **Tables** should be numbered separately from the illustrations. By default, tables and their captions are justified. Please make sure that every table is preceded by a caption.
- At the end of the paper, the **references** should be listed in alphabetical order of surnames. The `\cite` and `\bibitem` mechanism for bibliographic references is obligatory.
- For a description of other useful packages and SVMult class options, special commands and environments tested with the SVMult document class see the Reference Guide in `refguide.pdf`.
- For a detailed description of how to fine-tune your text, mathematics, and references, of how to process your illustrations, and of how to set up your tables, see the enclosed Author Instructions in `authinst.pdf`.
